ANNUAL REPORT FOR 2016 FISCAL YEAR
I. Introduction

Established in 2012, ACTION FOR THE NEEDY IN ETHIOPIA (ANE) is steadily growing with an increasing effort to reach out to the most vulnerable communities with a comprehensive agenda. ANE was registered as the Ethiopian resident with license No.2825 by FDRE charities and societies agency/CHSA/ to work in pastoral and Agro Pastoral Regions in Ethiopia. ANE was granted operational license from Ministry of Agriculture Disaster Risk Management and food security sector to work in 9 Regional States of the country. Initially, it started working in Guji and Borena zones of Oromia Region and Liben Zone of Somali Region for they were suffering from recurrent drought.

In the past four years, ANE has reached and served more than 270 thousand beneficiaries including most vulnerable host communities and refugees. It provides critically needed humanitarian support - shelter, food, water, sanitation and hygiene (WASH), livelihood, prevention of communicable diseases and educational material support. These services are provided in response to emergency needs with a focus on saving lives and mitigating human suffering caused and perpetuated by human-made and natural disasters.

Vision
To facilitate development of communities and environments that can cope with natural disasters and mitigate risks.

Mission
To address the basic needs of the neediest (the most vulnerable) by mobilizing resources from national and international partners and supporters.

Values

Integrity: Our track record of performance, serving both the refugees and the host communities, with a high degree of impartiality, ensures organizational and operational integrity in principle and action.

Trust–worthiness: We strive to ensure solid and sustainable trust–worthiness by maintaining a strong discipline of transparency and accountability at all levels in our organization and operations.

Diversity: The diversity of our services underscores our commitment to strong gender and age responsiveness, as women and children represent most of the beneficiaries in our operations.

Community participation: The strong emphasis we place on community participation derives from the basic recognition of the critical role of the beneficiaries as primary stakeholders. We fully understand that nothing short of their full participation, creates the required dynamics that makes a difference in the management of our service.

Partnership development: Based on our increasing performance and accountability, partnership development continues to stand out as the key factor that determines the degree to which our efforts can succeed with a strong process that ensures growing outreach and net-working.
II. Strategic plan
ANE has developed a strategic five years plan to be implemented between 2016 and 2020. Based on our experiences and with full understanding of the implications of the diversity of humanitarian and development needs that have to be addressed in a comprehensive agenda, ANE’s multi-sectoral engagement in the next few years will be directed under two major strategic goals.

Strategic Goal One
Continuation and consolidation of humanitarian service delivery, saving lives and mitigating human suffering, based on comprehensive engagement in relief, recovery, rehabilitation and resilience.

Alleviating the adversity and complexity of the needs of the vulnerable, host communities and refugees represents our primary line of strategic and operational focus. The humanitarian imperative is what drives the nature and scale of our intervention and engagement.

Strategic Goal Two
Continuation and consolidation of livelihood support with increasing contribution to basic human development.

While the life-saving services, provided under Strategic Goal One, are critically important to address the emergency needs, they are not sufficient to deal with other portfolio of needs that require basic improvement of livelihoods building up capacities for development in a more sustainable approach. As emergency and development can hardly be separated in reality, a more comprehensive agenda is required to deal with the totality of the problem.

The diversity and complexity of needs of the host communities and refugees require a more forward-looking engagement in addition to and beyond what can be delivered during the emergency phase. Continuation and consolidation of livelihood support represents a major area of strategic and operational focus depending on the specific modes of livelihood and the risk factors that adversely affect the beneficiaries including host communities and refugees.

III. Main objective
✓ To scale up programs and projects for most vulnerable and disaster affected individuals, households and communities to prevent and alleviate human sufferings.
✓ To reduce vulnerability through integrated & targeted Disaster Relief and Rehabilitation interventions and thus, minimize its adverse effects.
✓ To enhance institutional and organizational development for efficient and effective service delivery, and self-sustenance

IV. Major Area of intervention
• Emergency response
• WASH (Water, Sanitation and Hygiene)
• Livelihood support
• Environmental protection
• Shelter and infrastructure
• Prevention of communicable diseases
• Facilitating access to education
• Gender Issues and support for vulnerable children.
• Capacity Building-institutional development
V. Operational Areas
ANE is permitted to operate in 9 regional states of the country, namely: Oromia, SNNPR, Tigray, Somali, Afar, Amhara, Benshangul-Gumuz, Gambella and Harari. So far, with the objective of reducing the plight of pastoral/agro-pastoral communities and refugees, ANE has been working to reach the neediest households living in Liben, Negelle, Megado, Dillo, Bule-Hora, Sude, Woredas of Oromia Region, Moyale and Udet woredas of Somali Region Jewi, Kule, Terkidi and Negunyyiel camps of Gambella Region and Tsore camp of Benishangul Gumuz Regional state.

ANE’s HQ found in Addis Ababa with operational branch and coordination offices in Negelle, Mega and Gambella Region.

VI. Organizational structure
The General Assembly consists of 41 persons is the supreme body of the organization. The board of directors which was elected from among the General assembly has seven members who execute the General assembly’s decision, prepare directives and guide the management body. There are two important committees, namely the Advisory Committee and Fund Raising/Income Generating Committee whose accountabilities are to the board. Moreover, to make project operations effective, ANE has well organized staffs at both operational areas and HQ.

VII. Partnership
ANE strives to address the suffering of the most vulnerable and marginalized people in general and refugees in different parts of the country. ANE is working closely with government offices at all levels. It has established good relations with the FDRE of Administration for Refugees and Returnees Affairs (ARRA), UNHCR, WHO, other Government and Non-Government bodies, various Embassies, Coordination and cooperation offices and companies.

The Embassies and Cooperation and coordination offices assisting and working closely with ANE are Embassy of the People’s Democratic Republic of China, Japan Embassy, Australia Embassy, and UAE Embassy in Addis Ababa, TIKA and Upstream Investment.
ANE also is supported by private and commercial banks such as Dashen Bank, Oromia International Bank, Oromia cooperative Bank.

VIII. ANE’S BOARD MEMBERS:

1. H. E. Ambassador Asfaw Dingamo, MP, MSc
   Currently, Plenipotentiary Ambassador of the FDRE in India,
   ANE Board Chairman
2. H.E Elema Kamphe, BA
   Head of Oromia Region Finance &Economic Development Bureau
   ANE Board Vice Chairman
3. H.E Mrs. Fozia Amin MA
   With the Rank of Minister, Chief Ombudsman of Ethiopian Institution of Ombudsman
   President of African Ombudsman and Mediator Association (AOMA),
   Member of ANE Board
4. H.E Dr. Taye Tolera
   Head of the office of the State Minister of the Federal Minister of Health,
   Member of ANE Board
5. Dr. Maru Gama MD
   Specialty in General Surgery, Sub-Specialty in Pediatrics Surgery
   Member of ANE Board
6. Mr.Huka Dida BA
   Business Administration, Deputy Administrator of Gujii Zone
   Member of ANE Board
7. Mr. Seyum W/Meskel, BSc
   Former Head of Ethiopian Freight Transport Corporation
   Member of ANE Board
IX. ANE ADVISORY COMMITTEE MEMBER’S: -

1. **H.E Mr. Assefa Kessito LLM**  
   Former Minister of Justice and Advisor to the FDRE president

2. **H.E Mr. Abera Tola**  
   Former Oxfam America Regional Director

3. **H.E General Alo Abdi**  
   From Defense Ministry of the FDRE

ANE’s Fund Raising Committee has 7 members with high profile personalities (Ministers, Professionals and civic society members.)
X. Major Achievement by sector

1. Water trucking operation

Provision of potable water through emergency water trucking has been the major area of intervention for ANE in the last three years. ANE distributed potable water in Dillo and Megado Kenyan Borena refugee camps of Borena zone Oromia regional state and Jewi, Kule and Negunyyiel south Sudanese refugee camps of Gambella Region with the financial and technical support of UNHCR/ARRA.

1.1. Water trucking operation in Dillo & Megado Refugee camps, Oromia

In 2016, the Kenyan Borena Refugees and surrounding host communities, health posts and schools have been getting access to potable water through water trucking accordingly from 1st Jan- 31st Dec, 2016. A total of \(60,411,020\) liters of potable water were distributed to 8,083 refugees and some host communities which is according to the minimum UNHCR standard of 20 litter/person/day. Those who were travelling long distance to get drinking water were made to get the amount of water required for each household.

![Fig 1. Provision of potable water for Refugees and Host communities in Dillo and Megado Refugee camps Borena zone, Oromia Regional state in 2016](image)

1.2. Water trucking operation in Jewi, Kule & Negunyyiel refugee camps, Gambella

In connection a total of 242,951,000 liters of potable water had been distributed partially in Jewi, Kule and Negunyyiel South Sudanese refugee camps, Gambella between January and December 2016. On average \(15\) to \(20\) liters/person/day of water was distributed to the targeted refugees.

Up to the end of December 2016, permanent water system was not fully functional at Zone G of Kule camp, Zone C of Jewi camp and in newly established Negunyyiel camp. However expensive in terms of cost the distribution of potable water among the refugees believed to reduce water borne diseases and improves sanitation related health problems.

![Fig. 2. Provision of potable water for Refugees in Jewi Refugee camps Gambella Regional state in 2016](image)
2. Livelihood support

2.1. Provision and follow up of breeding sheep and Goats for livelihood improvement in Dillo and Megado camps, Oromia

ANE plan to improve the livelihood condition of Kenyan Borena refugee with additional dietary supply through goat/sheep rearing. Accordingly, a total of 2019 breeding sheep and goat are planned to be provided for identified families from Dillo & Megado refugee camps of Borena zone Oromia Region. Up to the end of December 2016, 2021 locally adaptable breeding sheep/goats were distributed to 716 households in Dillo and Megado refugee camps. Out of these 1,276 are provided in Megado while 745 for Dillo refugee camps.

The field office of ANE with its assistant veterinarians is so far providing follow-up and technical support for families who received sheep and goat. Based on the field assessment report, up to the end of December 2016, a total of 1,261 new sheep and goats are born (440 at Dillo & 821 at Megado). However so far, in the last 12 months 82 sheep are recorded to be dead. The follow-up and support will continue with the help of the field office technical staff.

Fig 3 Provision of breeding sheep/goat for livelihood improvement in Dillo and Megado Refugee camps, Oromia Region 2016

2.2 Provision sheep for their protein supplement in Dillo and Megado camps, Oromia

In connection with, ANE with the financial support of Turkish Diyanet Foundation distributed 1,500 sheep on the occasion of New Year and EID Al-Adha Holidays in 2016 (850 sheep at Megado Refugee camp and 650 at Dillo Refugee camp) from September 12-13, 2016. The distribution took place in the presence of representative of ARRA Moyale sub office, two representatives of Turkish Dyanet Foundation (country distribution officer and international Auditor) and Representatives of woreda and Zonal level relevant Government organizations were present in the distribution process. The beneficiaries of the sheep distribution include 730 Kenyan Borena Refugees households and 770 host community households at Dillo and Megado based on their family size.

Fig. 4 Provision of sheep for their protein supplement to refugees and host communities in Dillo and Megado Oromia Region, 2016

Similarly, with the budget secured from Rainbow charitable association humanitarian organization from Turkish ANE also has contributed in fulfilling the nutritional need of 730 Kenyan Borena Refugees in
Dillo and Megado camps through providing 45.1 Quintals of wheat flour, 45.1 Quintals of Rice, 22.55 Quintals of Lentil and 2,255 Liters of Edible oil in June 2016.

3. Shelter Construction

3.1. Construction of Improved shelter in Dillo and Megado camps, Oromia

In 2016 with technical and financial support obtained from UNHCR/ARRA, ANE constructed 150 improved shelters using locally available material for Kenyan Borena Refugee in Dillo & Megado camps in Borena Zone, Oromia Regional state.

The improved shelters that were constructed at both camps are 20-meter square area (5 meter with 4-meter width). The wall is constructed by the termite resistance Juniperous woods and the roof is covered with iron sheet.

Based on this, during the last 12 months’ 150 improved shelters (90 in Megado and 60 in Dillo) were constructed and handed over to the beneficiary community and ANE were conducted a shelter handovering ceremony at both camps with the presence of representatives of ARRA sub office, UNHCR HQ, Government officials and ANE Board’s.

3.2. Construction of transitional shelter in Terkidi camp, Gambella

In 2016, with technical and financial support obtained from ARRA and UNHCR, ANE has been engaged in construction of transitional shelter in Terkidi camp, Gambella Region. It was planned to construct 700 transitional shelter using local resources. In a very short period ANE enabled to construct and hand over 352 transitional shelters in Terkidi refugee camp. However, following the recent influx of refugees to the Gambella region of Ethiopia, the construction of the transitional shelter has been suspended for some time while, ANE was receiving another urgent assignment which includes construction of emergency shelter,
site clearing, tent pinching and Bajaj construction as well as road construction assigned by UNHCR/ARRA.

Some of the emergency activities that made by ANE to host the new arrivals include:

- **15** Hangar rooms (10 at Terkidi and 5 at Negunyyiel) was Constructed and handed over to the new arrivals from south Sudanese Refugees. The Hangar rooms cover (10m*20m) area and it has 44 partitions to serves 44 HH. 15 hanger X 44 partition X 4person = Hangar rooms will serve 2,640 new arrival south Sudanese Refugees.
- **128 M³** Hanger room floor work was done with fine selected materials: 20-meter length with 10-meter width and 20cm depth for 15 Hanger Rooms.
- **600 M³** Rub hall floor work was done with fine selected materials: 32-meter length floor with 10meter width by 20cm depth for 2 Rub hall.
- **60 hectares** of Bush Clearing was accomplished at the new site of zone E Terkidi camp.
- **104 M³** Filling an open ditch was accomplished with selected materials: 10-meter length with 4-meter width and 2meter diameter.
- **18** Emergency Kitchen were built at Tierkidi Refugee camp to serve 18,000 new arrival south Sudanese refugees.
- **60m³** of soil were transported and dumped by ANE to fill the latrine used by refugees found at Pagak entry point and 75m³ of selected material provided for the ARRA Terkidi site.
- ANE also undertook clearance of dense bush grassland for the opening of the new refugee camp called Negunyyiel. The plan is to clear 250 hectare of dense bushes. As of the end of December 2016, 200 hectares of land were cleared and the remaining work was completed before end of January, 2017. In connection with this, Tent pinching is undertaken at zone D of Tierkidi refugee camp. From planned 485 tents that will be pinched, 300 tents are pinched and the remaining 185 tents are not yet pinched because of space shortage.

At the beginning of November, 2016 ANE started the suspended transitional shelter in Terkidi camp and up to the end of January 2017 accomplished and handedover the planned 700 transitional shelter to the beneficiary refugees. Out of which 200 transitional shelter constructed for vulnerable refugee and the remain 500 transitional shelter constructed for able bodied south Sudanese refugee in Terkidi camp. The transitional shelters that were constructed at Terkidi camp, the super structure and the wall are constructed by bamboo and mud plastered and also the roof is covered with plastic sheet and grass hatched.

*Fig. 7 Among Constructed transitional shelter in Terkidi camp, 2016*
3.3 Construction of Emergency Shelter/ Bajaj in Negunyyiel Refugee camp, Gambella

As mentioned above the construction of emergency shelter was one of the activities that has been included in the amended PPA of the year 2016. Accordingly, ANE has been constructing emergency shelters (Bajaj) for new arrival South Sudanese refugees settled in Negunyyiel refugee camp. The annual plan according to the recently amended agreement was to complete and hand over 3,000 Bajaj in zone A of the new refugee camp Negunyyiel.

Up to the end of December 2016 the overall work of the 3,000 emergency shelters was done and handed over to the beneficiary refugees in the newly established Negunyyiel refugee camp. The plan accomplishment of overall work is 100%.

Fig. 8 Among Constructed Bajaj shelter in Negunyyiel refugee camp, 2016

4. Construction of Latrine

4.1 Construction of communal latrine in Dillo and Megado Camps, Oromia

To decrease the problems of sanitation and hygiene of the Kenyan Borena Refugee in Dillo and Megado camps through the construction of communal latrines, ANE planned to construct 9 communal latrines (5 at Megado and 4 at Dillo Refugee camps) in 2016 fiscal year. Based on this up to the end of December 2016 ANE constructed and getting ready for use the planned 9 communal latrines (5 at Megado and 4 at Dillo Refugee camps). The constructed latrines at both camps each have 6 seats and have iron sheet cover. In terms of the annual plan, the communal latrines constructing at both camp are 100% completed.

Fig. 9 Among constructed communal latrines in Dillo& Megado camps, 2016

4.2 Construction of household latrine in Jewi Refugee camp, Gambella

In 2016, ANE has been engaged in construction of household latrine in Jewi Refugee camps, Gambella Region with the objective of reducing the vulnerability of the South Sudanese refugees and hosting community from different communicable diseases and thereby ensuring their wellbeing through improved hygiene and sanitation practices.
ANE was planned to construct 1,280 household latrines in Jewi Camp. From January to October 2016, ANE has constructed 571 household latrines and handed over to the refugees and the surrounding hosting community. Out of the completed 571 household latrines, 540 are handed over to refugees and the remaining 31 are for host community at Jew camp. Following the new refugee influx in Gambella Region beginning from September 2016 with the agreement made with UNHCR and ARRA, the budget that was allocated for the construction of the remaining 709 household latrines has been shifted to the construction of emergency latrine. In accordance with the new arrangement and the recently amended agreement (October 2016) with ARRA and UNHCR, 426 emergency latrines are agreed to be constructed at Terkidi, Jewi and Negunyyiel refugee camps. Out of which 100 emergency latrines to be constructed at Terkidi, 100 at Jewi and the remaining 226 emergency latrines. Based on this agreement with UNHCR and ARRA, up to the end of November 2016, ANE constructed 60 emergency latrines at Tierkidi refugee camp (Zone A) but with the decision of relocating refugee to other side of Tierkidi refugee camp, the previously constructed 60 latrines along with 40 dug holes were demolished.

Up to the end of December, 2016, 326 emergency latrines (100 in Jewi and 226 in Negunyyiel Camps) constructed and handed over to the refugee’s refugee community in both camps. This indicated the 100% accomplishment rate of the annual plan.

5. Construction of Speed Bumps and Installation of Traffic Sign Post in Jewi, Kule and Tierkidi refugee camps, Gambella

In addition to the various construction and capacity building activities carried out in 2016, following to the occurrence of the traffic accident in April 2016 at Jewi camp, ANE took the responsibility for the prompt engagement. Meanwhile, construction of speed bumps within camps and installation of traffic signposts were undertaken as the best alternatives to hamper possible traffic risks, at three camps [Tierkidi, Kule and Jewi]. Thus, up to the end of 2nd quarter, Accordingly, ANE installed traffic sign posts, (20 at Tierkidi, 14 at Kulle and 12 at Jewi Refugee camps). Moreover, to control traffic flows at the refugee camps, ANE constructed 77 speed breakers having an interval of 200 meters covering 24 km at three refugees’ camps.

![Fig. 10 Among constructed speed breakers and installation of traffic sign posts in Jewi Refugee camps, 2016](image)

6. Construction of Gravel Road, Ditch, Drainage & Culvert Works in Negunyyiel camp, Gambella
With the objective of improving access to the newly established camp, ANE planned to construct 20 kilometer gravel road from the main asphalt road to the inside parts of the Negunyyiel camp. Using its construction team ANE completed the opening, clearing, rolling and placing the layer works for the road. Currently 16km gravel road that runs from the main asphalt road to Negunyyiel refugee camp and 4 Km Alternative roads totally 20 Km gravel road are constructed & are serving the refugees and organizations. Similarly, 20 Box culverts are also constructed along the main road which runs to the new camp. Sign boards are placed along the roads giving information to the cars passing by. In addition, 5 km drainage were constructed in Negunyyiel refugee camp up to the end of December 2016. ANE has been organizing construction materials, machines and human resources to complete the construction works within the schedule.

Fig .11 Construction of main access road, Negunyyiel refugee camp, Gambella, 2016

7. Construction of solid waste disposal pits and provision of Sanitation and hygiene training

7.1 Construction of solid waste disposal pits in Dillo and Megado Refugee camps, Oromia

In 2016, with the objective of facilitating efficient and effective waste disposal at both Refugee camps, the construction of 6 waste disposal pits (2 at Dillo and 4 at Megado camps) were constructed and ready for use at both camps.

Fig 12. Among constructed solid waste disposal pits at Dillo and Megado Refugee camps in 2016

Under the same objective as the above activity, up to the end of October 2016 4 sessions of training for incentive worker have been conducted at Dillo and Megado refugee camps. The participants are 35 incentive workers 20 of the trainees are from Megado while 15 are from Dillo refugee camps.
The emphasis of the training was on hygiene and sanitation promotion and it took 4 Days at each training site. The training was conducted in collaboration with Dire Woreda health office and RCC with the objective of creating awareness to the entire community in the refugee camps on the following topics; Personal and household hygiene; Environmental hygiene and latrine management; Water hygiene and storage management and Awareness on prevention of communicable disease. The plan accomplishment is 100%.

7.2 Construction of solid waste disposal pits and training for incentive worker in Jewi Refugee camp, Gambella

In 2016 in collaboration with the UNHCR/ARRA, with the objective of efficient and effective waste disposal at Jewi refugee camp, the construction of 8 solid waste disposal pit has been accomplished and have been made ready for use in Jewi Refugee camp up to the end of August 2016 and the present accomplishment is 100% compare to the annual plan.

In accordance with the 2016 plan, ANE distributed sanitary and cleaning material to the refugee families who are residing in Zone C & D of Jewi refugee camps.

In collaboration with the ARRA and community incentive workers the following list of cleaning materials are distributed to the families of refugees in December, 2016.

Similarly, ANE has organized three days training on community emergency health and sanitation management. The training was facilitated with ARRA public health team and regional bureau health experts. The training was conducted for three days from 25 – 27 December, 2016. Totally 76 local community health incentive workers have taken part on the training. Topics that are covered in the three days training includes the following:

Construction Usage and Maintenance of Sanitary Latrine; Control of Insects, Rodents and Other Biting Species; Food Hygiene and Safety Measures; Personal Hygiene; Solid and Liquid Waste Management; Water Supply Safety Measures; Adolescent Reproductive Health; Family Planning; First Aid; Prevention and Control of HIV_AIDS, Malaria and Tuberculosis.
8. Support person with specific need in Dillo and Megado Refugee camps, Oromia

Having conducted thorough assessment, ANE identified 171 persons with specific needs. The selected persons with specific needs include elderly people, people with visual impairment, people with moving difficulties, People living with HIV/AIDS patients, poor widows, orphans and vulnerable children.

Accordingly, up to the end of December 2016, ANE distributed ready-made cloth for the 171 identified elders and people with specific needs in Dillo and Megado refugee camps.

Three children having hearing problems also diagnosed and received medical treatment in Hawassa referral hospital. Two of them need to get further surgical treatment and hearing aids.

Fig 13. Provision of clothes to elderly and persons with disabilities in Dillo and Megado Refugee camps in 2016

In addition to the above services, ANE in collaboration with Cheshire Service Ethiopia technicians through orthotics assessment identified 32 people living with disabilities or who have moving difficulties from the refugee camps and surrounding host communities.

Based on physiotherapist and orthopedic technician assessment up to the end of December, 2016 for 32 persons living with disabilities (PWDs) the following services provided to 18 Kenyan Borena Refugees in Dillo and Megado camps and 14 Host communities in Mega city and Bule- hora district of Oromia Region.

- 14 people with moving difficulties received 25 elbow crutch
- 2 people with moving difficulties received wheelchair
- 12 people with moving difficulties received Ankle Foot Orthoses (AFO) and shoes
- 1 person received hand splint
- 1 person received bilateral partial foot and shoes
- 1 person received bilateral AFO and shoes
- 1 person received TT prostoil shoes

So far 32 persons with specific needs from Dillo and Megado refugee camps and host communities have received different kinds of services and material assistance. See the below table 1
9. Environmental protection activities in Dillo & Megado Camps, Oromia

In 2016 fiscal year, ANE has been working on the environmental protection activities in Dillo and Megado Refugee camps in collaboration with Dire district pastoral development office. So it distributed 1,500 different kinds of seedlings in collaboration with ANEs Mega branch office & Refugee central committee (RCC) at both camps.

10. World Refugee Day celebration

10.1 June 20 World Refugee Day celebrated in Dillo & Megado Camps, Oromia

In the 2nd quarter of 2016, ANE Mega branch office, ARRA Moyalle field office and MCDO jointly commemorated the world Refugee day on 20th June 2016, with a Refugee and members of hosting community in Dillo and Megado camps with the motto of “We stand together with # Refugee”

The activities undertaken during ceremony:

- ANE distributed 150 T-shirt and 150 caps for participant
- Environmental protection was promoted through planting 420 seedlings by Refugee community, ARRA, ANE and MCDO in Dillo and Megado camps.
- The program was started by the Praying of elders, welcoming speech by community representative
- Sport and games, Drama, Traditional Dance, rope pulling computation running with egg sack Jumping
- Clothing speech by ARRA Moyale field office representatives
10.2. June 20 World Refugee Day celebrated at Terkidi Camp, Gambella

ANE Gambella field coordination office, ARRA Gambella field office, UNHCR Gambella sub-office and other IPs jointly commemorated the world Refugee day on 20\textsuperscript{th} June, 2016 with south Sudanese Refugee at Terkidi camp with the motto of “\textbf{We stand together with # Refugee}”. In response to the request of UNHCR, ANE constructed plastic Shed with size of 20-meter length and 6-meter width for the celebration of world Refugee day. The activities undertaken during ceremony include:

- Program started by the welcoming speech of ARRA and UNHCR representative
- Environmental protection was promoted through clearing the camp by Refugee community, ARRA, ANE and other IPs.
- Sport and games, Drama, Traditional Dance, football and etc. were shown.

11. Drought Response Interventions

It is announced that three Regions in Ethiopia namely Somali, Afar and Oromia are highly affected by severe Drought resulting from El-Nino. Action for the Needy in Ethiopia being an auxiliary to the government, strived to contribute and support the neediest ones to its level. Having made an assessment, it came to the conclusion that Arsi Zone in Oromia Regional state was found relatively accessible and convenient place for ANE to render its support.

11.1. Water trucking operation in 13 kebele of Arsi Zone Sode District, Oromia

In November, 2015 Action for the Needy in Ethiopia deployed 20,000 litters capacity water trucker for Arsi Zone Sode District to serve 13 Kebeles where the communities were severely affected by El-Nino induced drought. ANE deployed the water trucker for 5 consecutive months by covering the total rental cost of water trucker from its own limited financial source until access to potable water was ensured following the onset of Belg. By so doing ANE supported the supply of potable water for at least 8,653HH or 43,265 Drought affects people. This is 65\% of the planned beneficiaries in 2016.

Fig 16. Water trucking operation for drought affected people at Arsi Zone Sode District, Oromia, in 2016

12. Provision of Supplementary food in Itya and Digula- Ticho districts of Arsi Administration zone, Oromia
In addition, with the financial support of Rainbow Charitable Association (RCA) ANE facilitated the distribution of food items to support 600 drought affected households in Iteya and Digula-Ticho Woredas of Arsi administrative zone in Oromia regional state. The food items and the distribution modality include 5Kg Wheat Flour, 3Kg Rice, 3Kg Macaroni, 2Kg Sugar, 2Kg Beans, one litter Edible oil and 2pices of Soap per each beneficiary.

13. Support to Orphan and Vulnerable Children Support
In 2016, ANE in collaboration with distributed children cloth donated from Rainbow Charitable Association (RCA) Turkish humanitarian organization. The 260 readymade cloth for boys and girls were distributed to orphan and venerable children in Addis Ababa City Woreda 4 Arada Sub-city. The distribution took place in the presence of children parents (foster parent), Rainbow Charitable Association RCA country representative and other invited guests.
